 Portfolio

 Hyderabad, India

Profile

Builder focused on developing practical, real-world tech solutions through **automation** and **scalable** systems. Experienced in creating **full-stack applications, backend workflows, and CI/CD-driven pipelines** for real use cases. Currently exploring **Cloud** and **DevOps** to design reliable, production-ready systems.

Currently working as a **freelance developer** for **Startups India**, building a production-ready Flutter media platform prepared for **Play Store launch**.

Actively exploring **Blockchain (Algorand)**, and solving **DSA** problems on LeetCode.

Education

Bachelor of Technology (B.Tech.) in Information Technology
Vidya Jyothi Institute Of Technology
CGPA - 9.63/10

08/2024 – Present
Hyderabad

Skills

Docker

Terraform

Ansible

GitHub Actions

Prometheus

Grafana

CI/CD Pipelines

AWS

Oracle Cloud (OCI)

Google Cloud (GCP)

Cloudflare

Python

Git & GitHub

Fast API / Flask

FireBase / Supabase

Flutter

AstroJS

Linux

Algorand

AI Full Stack

Professional Experience

- Startups India (Freelance)**
Full-Stack Developer

02/2026 – Present

 - Sole developer building a production-ready Flutter media platform with backend integrations, currently being prepared for Play Store launch
 - Migrating existing WordPress-based workflows into a scalable custom-built platform architecture
 - Working on deployment workflows, backend APIs, media delivery systems, and platform scalability
- DevUp Society, VJIT**
Tech Lead

09/2025 – Present

 - Leading development of internal platforms including event management systems, registration workflows, and task tracking tools
 - Designed and maintained automation pipelines for deployments and backend processes
- E-Cell, VJIT**
Tech Lead

02/2026 – Present

 - Leading development of the E-Cell website and digital platforms
 - Building scalable systems for event registrations, ticketing, and automated certificate generation
- AWS Cloud Club, VJIT**
Event Management Lead

01/2026 – Present

 - Organized and managed technical events, workshops, and hackathons (~200+ participants)
 - Coordinated between technical and operational teams to ensure smooth execution
- Prodigy Infotech**
Android Development Intern

 - Developed and contributed to mobile application features and UI components
 - Gained experience in real-world development workflows and deployment cycles
- Google Gemini Student Ambassador**

04/2026 – Present

 - Tech Team Member**
 - Developer Student Society (DSS)
 - Algorand Blockchain Club
 - Quantum Computing Club
 - Computer Society of India (CSI), VJIT
 - IEEE VJIT Chapter (IT Department)

Projects

Startups India – Media Platform (Production System) [↗](#)

Flutter, Dart, Firebase, Python

- Built a production-ready media platform application with full backend integration, currently prepared for Play Store deployment
- Migrated legacy system from WordPress to a custom-built scalable architecture
- Designed content handling workflows and API integrations to support dynamic media publishing

Portfolio Infrastructure & Monitoring Pipeline

Docker, Terraform, Ansible, GitHub Actions, AWS, Prometheus, Grafana

- Built an end-to-end CI/CD and infrastructure automation pipeline for deploying and monitoring a production portfolio system on AWS
- Automated Docker builds, deployments, and EC2 configuration using GitHub Actions, Terraform, and Ansible
- Integrated Prometheus, Node Exporter, Grafana dashboards, and Discord alerting for real-time monitoring and observability

DevUp Society – Website & Automation Systems [↗](#)

AstroJS, Serverless Functions, APIs, Cloudflare

- Developed and deployed the official DevUp website ([devupvjit.in](#) [↗](#)) with end-to-end ownership including domain setup, hosting, and deployment
- Built complete event infrastructure including ticket generation, email automation, and payment-integrated registration systems
- Implemented backend workflows and automation systems to streamline event management and user handling

VJIT Study Vault – Student Platform (1000+ Users) [↗](#)

Flutter, Firebase, Firestore, React, Cloudflare (Web + PWA)

- Developed a centralized study-material platform used by 1000+ students within the college
- Implemented file storage, retrieval, and user onboarding systems for seamless access to academic resources
- Designed scalable backend structure to handle growing user data and content

Certora – Certificate Automation Platform

Tauri (Desktop App), React, FastAPI, Python

- Building a desktop-based certificate generation platform with customizable templates and automated batch processing
- Integrated FastAPI backend with Tauri desktop architecture for a lightweight single-app deployment experience
- Designed drag-and-drop style workflows for dynamic certificate field positioning and export automation

Awards

Top 10 Contributor – Elite Coders Winter of Code (ECWoC)

Elite Coders Winter Of Code (ECWOC)

Ranked **6th out of 5000+ developers** in a large-scale open-source program, contributing to real-world projects and collaborative codebases

1st Prize – Git Arcana

Chaitanya Bharathi Institute of Technology (CBIT)

Secured first place in a competitive Git/GitHub-based problem-solving event

2nd Prize – Cyberonix Cybersecurity Hackathon

Supraja Technologies

- Secured 2nd place in a time-bound Capture The Flag (CTF) competition among 200+ participants
- Solved challenges across network analysis, steganography, and cryptography using tools like Wireshark

2× 2nd Prize – PitchQuest (2024 & 2025)

ECell VJIT

— For projects MyCloset and ShadowMesh

2nd Prize – Web Mirroring Competition

KG Reddy College of Engineering & Technology

Recreated complex website interfaces under time constraints
