EDUCATION

Vidya Jyothi Institute of Technology

Bachelor of Technology in Information Technology; CGPA: 9.38/10

Hyderabad, India

Aug. 2024 – May 2028

NSR Impulse Junior College

Intermediate, MPC; Percentage: 94.7%

Hyderabad, India

2022 – 2024

EXPERIENCE

Startups India

App Development Lead Intern | On-site

Hyderabad

Jul. 2026 – Present

Freelance App Developer | Remote

Apr. 2026 – Jul. 2026

- Solely designed, architected, and developed a production-ready cross-platform Flutter application for India's startup ecosystem, owning the complete product lifecycle from requirements gathering and system design through development, testing, CI/CD, and Play Store preparation.
- Architected a modular, production-grade Flutter application using Riverpod, the Repository Pattern, Firebase Authentication, Cloud Firestore, and Cloudinary, while implementing backend integrations and GitHub Actions CI/CD pipelines for automated testing, build generation, and release delivery.
- Collaborated directly with stakeholders to gather requirements, iterate on product feedback and improve platform scalability

Elite Coders Summer of Code 2026 | [Website](#) | [GitHub](#)

Project Admin & Maintainer — Prism Bits

Remote

Jul. 2026 – Present

- Founded and maintain Prism Bits, an extensible open-source, multi-framework UI component library built around reusable, source-first components that developers can preview, copy, customize, and integrate into production interfaces.
- Manage the complete open-source contribution lifecycle by defining issues, assigning contributors, reviewing pull requests, providing technical feedback, enforcing code-quality and registry-validation standards, merging contributions, mentoring first-time contributors, and continuously improving the Next.js and TypeScript codebase.

E-Cell VJIT | [Live](#) | [GitHub](#)

Technical Lead

Hyderabad

Feb. 2026 – Present

- Lead the architecture and development of E-Cell VJIT's full-stack platform using Astro, TypeScript, Node.js serverless functions, Supabase PostgreSQL, Cloudflare R2, Cloudinary, and Vercel, overseeing feature delivery, deployment, and technical coordination.
- Engineered an end-to-end event automation system covering registrations, payments, confirmation emails, QR-based PDF ticket generation, browser-based attendance scanning, admin workflows, and automated certificate generation using Maileroo, qrcode, pdf-lib, Puppeteer, and html5-qrcode.

DevUp Society, VJIT | [Live](#) | [GitHub](#)

Technical Lead

Hyderabad

Sep. 2025 – Present

- Solely designed and developed DevUp Society's production website and event platform, owning UI/UX, frontend architecture, backend workflows, deployment, domain configuration, and ongoing maintenance.
- Built event registration, payment-verification, admin approval, automated email, and ticket-generation workflows supporting technical events attended by 200+ participants.

PROJECTS

Startups India Media Platform | [GitHub](#)

- *Flutter, Firebase, Firestore, Riverpod, Cloudinary, GitHub Actions* — Designed and developed a production-ready cross-platform application as the sole app developer, owning architecture, backend integration, testing, release workflows, and Play Store preparation.
- Built a modular codebase using Riverpod and the Repository Pattern, with Firebase Authentication, Cloud Firestore, Cloudinary media delivery, and automated CI/CD release builds.

Student Platforms & Event Automation | [DevUp](#) | [E-Cell](#)

- *Astro, TypeScript, Node.js, Supabase, Cloudflare R2, Vercel* — Solely designed and developed both platforms, owning UI/UX, frontend architecture, serverless workflows, database integration, deployment, and maintenance.
- Built registration, admin approval, payment verification, automated email, QR ticketing, attendance scanning, and certificate-generation workflows; supported DevUp events with 200+ participants.

Cloud Infrastructure & Observability Pipeline | [GitHub](#)

- *AWS, Docker, Terraform, Ansible, GitHub Actions, Prometheus, Grafana* — Built an Infrastructure-as-Code and CI/CD pipeline for deploying a containerized portfolio application on AWS.
- Automated EC2 provisioning, configuration management, Docker deployment, Prometheus and Node Exporter monitoring, Grafana dashboards, and Discord alerts.

TECHNICAL SKILLS

Languages: Java, Python, C, Dart, JavaScript, TypeScript, SQL, HTML, CSS

Frameworks & Libraries: Flutter, React, Next.js, Astro, Node.js, FastAPI, Flask, Riverpod, Tailwind CSS

Backend & Databases: REST APIs, Firebase, Supabase, PostgreSQL, MySQL, SQLite, Vercel Serverless Functions

Cloud & DevOps: AWS, Google Cloud, Oracle Cloud Infrastructure, Docker, Terraform, Ansible, GitHub Actions, GitLab CI/CD, Prometheus, Grafana

Tools & Platforms: Git, GitHub, GitLab, Linux, Vercel, Cloudflare, Cloudinary, Postman

ACHIEVEMENTS

- **Ranked 6th among 5,000+ developers** in Elite Coders Winter of Code 2026, earning a position among the program's Top 10 open-source contributors.
- **1st Prize — Git Arcana, CBIT:** Won a competitive Git and GitHub problem-solving event focused on version-control workflows and repository operations.
- **2nd Prize — Cyberonix Cybersecurity Hackathon:** Placed second among 200+ participants in a time-bound CTF covering network analysis, cryptography, and steganography.
- **2× 2nd Prize — PitchQuest:** Secured second place in consecutive editions in 2024 and 2025 for the projects MyCloset and ShadowMesh.

CERTIFICATIONS & CREDENTIALS

Harvard CS50x, CS50P & CS50 SQL | OCI 2025 Certified Foundations Associate

AWS Cloud Quest: Cloud Practitioner | Build Infrastructure with Terraform on Google Cloud | Intel Partner Technical Pro – Cloud DevOps
